

Conflict Minerals Statement

This statement is regarding the Dodd-Frank Act of 2010's conflict minerals disclosure. Main Manufacturing Products, Inc. certifies that our products do not contain any of these minerals as a necessary component. Our flanges are made here in Michigan, generally from low carbon steel or stainless steel (304L & 316L).

Main Manufacturing also maintains a file of our vendors "Conflict Minerals Statement" to insure that none of our raw material or tooling is in violation of the act.
